

OSHA - Prove your tunnel ventilation!

AirBoss200WR, Air-Velocity Sensor

- Forward/Reverse reading (-2,000 to +2,000 fpm)
- No moving parts; withstands dust and moisture.
- Wind tunnel calibrated; accurate, even near zero.
- Ideal for tunnels, continuously verify ventilation.
- 24VDC power, 150ma, 4-20ma analog signal out
- System logs fan performance; HMI graphics.
- Sensor stations can include AV, HC, CO, CO₂, H₂S, smoke, flame, sound/vibration and temp/RH.
- Displays fpm; SS and Plastic; low maintenance.
- Control variable-speed fans to conserve energy
- Proven for life safety in underground coal mines.
- Used in WIPP nuclear disposal mine, Carlsbad.
- Intrinsically Safe; MSHA and NRCan(EMR)

Made in Monroeville, PA, USA
800-783-9228 <sales@rel-tek.com>
